BAGATELLE NURSERY

P. M. KOSTER, Manager

"C'est une bagatelle"

Huntington Station, Long Island

MEMBERS OF

Long Island Nurserymen's Association American Association of Nurserymen

Chateau de Bagatelle

On a wager with Marie Antoinette, in 1780, the Comte d'Artois (later Charles X, the second King of the Restoration), built an entrancing little chateau with its charming gardens in the incredibly brief time of 64 days. The outlay was three million francs.

"C'est magnifique!", cried Marie Antoinette, on catching her first glimpse of the beauty spot which became an enduring reminder of her wager.

"Mais, non. C'est une bagatelle" answered the gallant Comte d'Artois. So in this romantic manner the name "Bagatelle" originated.

The gardens of the Chateau de Bagatelle, near Paris, are now used as testing grounds to determine the value of new roses, sent from all parts of the world. A most interesting place! So is the Bagatelle Nursery with its specimen evergreens, ornamental trees, Rhododendrons and new Azaleas. A cordial welcome awaits you.

Conditions of Sale

PRICES

The prices named in this list cancel all prices and sales conditions quoted in previous lists and offers. They are based on current market quotations, are subject to change without notice and are f.o.b. Nursery.

Balling and burlapping free of charge for evergreens and other material which is usually dug with balls of earth. Arrangements can be made, at an additional charge, to ball and burlap Deciduous Stock.

CLAIMS

Claims should be made in writing; we can not entertain any claims that are not made within ten days after receipt of the stock.

DISCOUNTS

2% discount will be allowed for payment in 10 days from date of invoice.

10% discount on prices for quantities of one hundred or more of one size and variety.

TERMS

All accounts are due first of second month following date of invoice. Cash or satisfactory trade or bank references must accompany all orders from purchasers unknown to us. Interest at 6% per annum will be charged on all overdue accounts.

PACKING

Packing is charged at the actual cost of the material used.

CARLOADS

We can ship by Express and Freight via Long Island Railroad connecting in New York with all other railroads and boatlines. No charge will be made for loading carload lots.

TRUCKS

We deliver by truck within a reasonable distance. We will be glad to make arrangements about delivery by truck at the time the order is placed.

Azalea Kaempferi Hybrids

Azalea Kaempferi Hybrids are gaining in popularity every year, which they fully deserve. They inherited the vertical growth from Azalea Kaempferi, one of the parents and also its hardiness. Both qualities make them very desirable for landscape plantings. The delicate pastel colored flowers are large and do not burn even in the full sun. They are also desirable for forcing; at three consecutive Flower Shows in New York, they were awarded Gold Medals. They were also awarded Gold Medals in various European cities.

The cover of the catalog of the 1937 New York Flower Show consisted of the colored plate of Azalea Othello, which illustrated an article on Azaleas in the 1936 March issue of House & Garden.

OUTSTANDING FEATURES ARE:

- 1. Thorough hardiness (16 degrees below zero).
- 2. Rapid growth.
- 3. Extreme floriferousness.
- 4. Large flowers (some measure $2\frac{1}{2}$ in. across).

Carmen

Delicate rose like Moss Pink (Phlox subulata).

Fedora

Rose, like the outer petals of the Bleeding Heart. Very large flowers.

Louise

Carmine, a lighter tint than that of Azalea Hinodegiri.

Othello

Salmon pink, the colour of the open flower of the rose Mme. Edouard Herriot.

Magnolia

For several years, after Quarantine 37 became effective, Magnolias were very scarce and high priced. We are now able to offer the best varieties at reasonable prices. They are fine plants symmetrically shaped and, being properly transplanted, safe to move.

MAGNOLIA glauca

Sweetbay

Creamy white fragrant three inch flowers in May and June.

— **liliflora nigra** Purple Lily Magnolia Long brownish purple flowers. Darkest of all.

— parviflora

Oyama Magnolia

This Magnolia blooms while the plant is in full leaf contrary to other varieties which flower before the foliage appears. It flowers much later and consequently the blooms escape being hurt by late frosts. The pure white waxy flowers are cup shaped with a very prominent center of crimson stamens. They will appear throughout the summer and autumn. We have a large stock in various sizes at reasonable prices.

— soulangeana Saucer Magnolia Purplish pink cups, 4 to 6 inches across.

4 to 5 ft..... 3.50

— alba White Saucer Magnolia Pure white large flowers.

—— lennei Lenne Magnolia Rosy purple pear-shaped cups. Flowering late, often blooming a second time.

Malus

Flowering Crabs are the rivals of Flowering Cherries. In fact, they are considered by many to excell them in beauty. They flower most profusely in a great variety of color, pure white, pink, white and pink, carmine, while in the fall, lasting until winter, the trees are covered with fruit, small tinv apples, yellow, orange, red and carmine, according to varieties. Moreover they are perfectly hardy, frost will not kill the flower-buds.

MALUS arnoldiana

Flowers semi double, coral pink changing to white, fruit yellow.

--- eleyi

Light purple foliage, later turning to green. Single, carmine flowers and carmine fruit in great abundance. The little apples ¾ in. across, make an excellent, beautifully colored jelly.

- floribunda

Bright pink buds, the open, single flowers white, forming a beautiful contrast of colors. Reddish yellow fruit.

— halliana parkmanni

Double, bright rose flowers, fruit purplish red.

— niedzwetzkyana

Young foliage tinged purple, later turning to green. Flowers single, carmine. Fruit carmine, much larger than the fruit of the other varieties but not so abundant.

- theifera

Exceedingly floriferous, flowers delicate rose, changing to blush white; fruit greenish yellow.

Picea pungens kosteri

Koster Blue Spruce

All our Koster Blue Spruce are grafted, the cions used are selected with the greatest care from plants we know to be true "Kosters". Even our very young plants are "staked" in order to secure well shaped plants with perfect leaders.

It was our Mr. Koster who, in 1886, grafted the first five cions of the Koster Blue Spruce which originated in his father's nursery.

Rhododendron Hybrids

NAMED VARIETIES

The Bagatelle Nursery makes a specialty of growing Rhododendrons and have first class facilities to do so. Experiments, at great cost, have been made in the last five years to test hardiness as for outside planting in the vicinity of New York; only the hardiest varieties should be chosen.

Varieties marked * need winter protection.

We have indicated behind each variety the maximum height available from 12 inches up.

America

Red, very pronounced blotches. (2 ft.)

Album elegans

Opening buds lilac, the open flowers white. (4 ft.)

Amphion

Clear pink with white center, very large truss. $(2\frac{1}{2} \text{ ft.})$

Catawbiense grandiflorum

Light purple, a very pleasing color. (2 ft.)

Dr. Dresselhuys

One of the very best reds grown, the same color as Chas. Dickens, a much better grower. (4 ft.)

Dr. Lovink

Approaches Dresselhuys in color but is not as good a grower. (2½ ft.)

*Goethe

Very large individual flowers, nearly white with pronounced light purple fringes, an unusual variety. (3 ft.)

Ignatius Sargent

Light clear red, very fine truss. $(2\frac{1}{2} \text{ ft.})$

Kettledrum

A very good red but straggly grower. (1½ ft.)

*Madame de Bruin

Crimson carmine, flowers of great substance, very large truss. $(2\frac{1}{2} \text{ ft.})$

One of the finest varieties for forcing not only for its gorgeous flowers, but also on account of its fine foliage.

Mrs. C. S. Sargent

Dark pink, a fine color, one of the best. $(2\frac{1}{2} \text{ ft.})$

Mrs. P. den Ouden

Red, similar to Dresselhuys. (2½ ft.)

NAMED VARIETIES—Continued

Nova Zembla

A very good red with pronounced dark blotches, a dense grower. (2 ft.)

Parsons Gloriosum

Pink shaded purple, excellent foliage. (2 ft.)

Roseum elegans

Pink shaded lilac changing to pink when open; the best foliage of all, very hardy. (4 ft.)

Roseum superbum

A shade lighter than the former, somewhat later flowering. (2 ft.)

Prices for well shaped bushy plants, in assorted colors:

12	to	15	in	1.50
15	to	18	in	2.25
18	to	24	in	3.00

Native Varieties

The Native Rhododendron we offer are nursery grown; they are far superior to collected stock. We will be very glad to send you prices for collected plants in carload lots either of one variety of one size or mixed varieties in sizes from $1\frac{1}{2}$ to 5 ft.

Carolinianum

Carolina Rhododendron

Compact clusters of very fine clear pink flowers blooming profusely the latter part of May. It is a compact grower with good foliage though considerably more narrow than the foliage of the Hybrids.

15	to	18	in	1.75
18	to	24	in	2.25
2	to	$2\frac{1}{2}$	ft	3.00

SYRINGA vulgaris

The following varieties represent the very best, they are not arranged in alphabetical order but according to color-groups, singles and doubles. This facilitates selecting a well balanced collection. Of the varieties marked * we have some large plants to offer.

WHITE

Single:

*Jan van Tol, pure white, bold trusses of large individual flowers, profuse bloomer.

Mont-Blanc, large panicles of pure white flowers.

Vestale, pure white, perfectly shaped.

Double:

Edith Cavell, handsome clusters, buds suffused cream.

Madame Lemoine, very large flowers.

*Miss Ellen Willmott, imbricated flowers of perfect form.

PINK AND RED SHADES

Single:

- *Ruhm von Horstenstein, long, massive pink trusses.
- *Lamartine, large rosy mauve clusters. A cross between Syriga vulgaris and Giraldi, flowering almost two weeks before the other varieties.
- *Reaumur, violet carmine and satiny rose, very fine.

Double:

*Edouard Andre, clear rose or nearly pink.

Leon Gambetta, pinkish lilac, enormous trusses. Mrs. Edward Harding, bright carmine panicles, very fine.

BLUE SHADES

Single:

Cavour, slate blue, large upright clusters.

Capitaine Baltet, handsome panicles of a bluish shade.

Double:

Jean Mace, bluish mauve, a distinct variety, very free.

*Katharine Havemeyer, perfectly shaped cobalt blue flowers, broad imbricated lobes.

President Grevy, huge, blue trusses, a very fine color.

LILAC

Single:

Charles X. fine lilac clusters, shaded violet.

Hugo Koster, well shaped lilac flowers, shaded red.

Maurice Barres, pale azure lilac, very large flowers.

Double:

NOTES

We Cordially Invite You to Visit Our Nursery

HOW TO REACH US:

By train: Come to Huntington, Wyandanch or Babylon. Notify us of your arrival, and we will be glad to call for you.

Tel. Farmingdale 850.

By automobile from New York: Take Grand Central Parkway, leave Parkway at the sign "Union Ave", the farthest eastern end of the present construction. Then turn left and when reaching the Jericho Turnpike proceed east. Our Sales Office is a few hundred feet before (west of) Route 110 on the Jericho Turnpike at Huntington, next to Dahlstroms famous restaurant. To reach the nursery turn right (south) from the Turnpike on Route 110, and follow signs.
